

Team Assessment Comparison Report

The Team Assessment is an excellent tool to gauge your team’s overall level of cohesion – and dysfunction!

The Team Assessment effectively “diagnoses” team dysfunction and provides excellent recommendations for developing weaker areas. When used as part of a five dysfunctions program with a skilled facilitator the Team Assessment is a useful tool for creating and implementing a team development plan.

Additionally, the Team Assessment Comparison Report provides a side-by-side view of initial results and current (post-team development) results, the effects of which can be astounding!
